Prestige Shape Body Sculpt Machine

4 HANDLES

- Fat Removal
- Muscle Building
- 30 minutes = 30000 muscle contractions

Overview

Muscles account for about 35% of the body, and most slimming devices on the market only focused on fat but not muscles. While currently only injections and surgery are used to improve the shape of the buttocks. In contrast, EMSLIM RF body sculpt machine, which uses the most advanced (HIFEM) high intensity focused magnetic vibration technology, directly stimulates motor neurons, so that the body's muscles continue to expand and contract (This kind of contraction cannot be achieved by your usual exercise or fit exercise) The energy pulse of 30 minutes treatment can stimulate 30000 strong muscle contractions, which help the fat cells to metabolize and decompose vigorously.

- **PRESTIGE Shape helps you easily gain muscle and reduce fat with remarkable results.**

The PRESTIGE Shape body sculpt machine has four treatment handles, and supports two or four handles to work synchronously; it can be operated by two people at the same time, and can be placed on the abdomen, buttocks, upper arms, thighs, etc. individually or at the same time. For those who want to quickly lose fat and increase muscle or change their body shape, it is an innovative reform device for postpartum women who can achieve postpartum abdominal muscle vest line, peach buttocks, and rectus abdominis separation.

The device is non-invasive, safe and painless, no radiation, no side effects, no need for anesthesia, you can be thin when lying down, it can tighten muscles and Body contouring, there is no discomfort during the treatment, and there is no need for a recovery period after the treatment.

How the PRESTIGE Shape Works

The PRESTIGE Shape adopts non-invasive HIFEM technology, releases high-frequency magnetic vibration energy through two large physiotherapy handles, can penetrate the muscle to a depth of 8cm, realize high-frequency extreme training, deepen the growth of myofibrils (muscle enlargement), and generate new collagen chains and muscle fibers (muscle hyperplasia).

Before Treatment

In Treatment

After Treatment

By using PRESTIGE (high energy focused electro- magnetic wave} technology to expand and contract muscles, limit training, and deep remodeling of muscle internal structure. That is, the growth of myofibrils (muscle enlargement) and the production of new protein chains and muscle fibers (muscle hyperplasia) to train and increase muscle density and volume.

By using PRESTIGE (high energy focused electro- magnetic wave) technology to expand and contract muscles, limit training, and deep remodeling of muscle internal structure. That is, the growth of myofibrils (muscle enlargement) and the production of new protein chains and muscle fibers (muscle hyperplasia) to train and increase muscle density and volume.

It is important to choose the right method to body contouring

- Choosing a relaxed and professional way to build muscle and burn fat without harming your health. Choice is more important than effort!
- Focused magnetic resonance (HIFEM) technology helps you gain muscle and lose fat easily.
- There is no need for hard exercise, no pain, no sweat, no need to take off clothes, and it is more time-saving and labor-saving.
- You only need to lie down for 30 minutes = 30000 times of muscle contraction (30 minutes of abdominal / hip treatment, equivalent to 30000 times of sit ups / squats}, so that you can easily lie down to build muscles and reduce fat.

How long will a course of treatment take? How long will it take effect?

4 times for a course of treatment,
interval 2-3 days to do once,
generally open a card set 6-8 courses
of treatment, which can get good results.

The best results are in the 2-4 weeks
after the treatment.

To break down fat and increase muscle mass,
patients need to be patient.

Usually after 4-6 treatments, muscle mass
increases by approximately
25% and fat can be reduced by 30%.

How HIEMT Shape Works

- There is no need for hard exercise, no pain, no sweat, no need to take off clothes, and it is more time-saving and labor-saving.
- You only need to lie down for 30 minutes = 30000 times of muscle contraction (30 minutes of abdominal / hip treatment, equivalent to 30000 times of sit ups / squats}, so that you can easily lie down to build muscles and reduce fat.

- By using HIEMT (high energy focused electro- magnetic wave} technology to expand and contract muscles, limit training, and deep remodeling of muscle internal structure, That is, the growth of myofibrils (muscle enlargement) and the production of new protein chains and muscle fibers (muscle hyperplasia) to train and increase muscle density and volume.

- HIEMT 100% limit muscle contraction of the technology can lead to a large amount of fat decomposition, fatty acids from the decomposition of triglyceride outflow, a large amount of accumulation in adipocytes. Fat acidity is too high, fat cells apoptosis, in a few weeks by the body's normal metabolism out of the body.

Equipment Advantages of PRESTIGE Shape

What are the advantages of the device

Four treatment handles, 4 channel control ways, support 1-4 handle synchronous work; it can operate two persons or four persons at the same time, suitable for men and women.

It's safe and non-invasive, non-current, non-hyperthermia, and non-radiation, and no recovery period.

No knife, no injection, no medicine, no exercise, no diet, Just Lying down can burn fat and build muscle, and reshape the beauty of lines.

Saving time and effort, only lying down for 30 minutes = 30000 muscle contractions (equivalent to 30000 belly rolls / squats).

4000W output power.

Option Cushion for pelvic floor muscle strength enhancement

Methods of building muscle & burning fat

e-MSLIM RF body sculpt machine

Medical research has proved that after completing a course of treatment, PRESTIGE Shape can effectively increase muscle by 25% and reduce fat by 30% at the same time. It presents the beautiful lines of waist coat line, mermaid line and peach hip.

Improving the abdominal muscles that have become loose due to separation of rectus abdominis, and shaping the vest line. It is especially suitable for mothers who have increased belly circumference and loose belly due to the separation of rectus abdominis after childbirth, returning to a girlish posture.

Exercise strengthens the core muscle group, including the abdominal muscles of the large core group (rectus abdominis, external oblique muscle, internal oblique muscle, transverse abdominal muscle) and gluteus major muscle in the small core group. The core muscle group can protect the spine, maintain the stability of trunk, maintain the correct posture, improve the athletic ability and reduce the chance of injury, provide structural support for the whole body, and shape a healthy young body.

Exercizing the abdominal muscles to shape the vest line

Exercizing the buttock muscles to shape the peach buttocks

Exercizing the oblique muscles in the abdomen to shape the mermaid line

HIFEM technology Improving separation of rectus abdominis

It may not be normal to have "mother belly" after childbirth!

As many as 60% of mothers have rectus abdominis separation after childbirth. After childbirth, there will be lower abdomen sagging, fat, protruding belly, lack of abdominal muscle strength, often accompanied by low back pain, lumbar muscle strain and other problems.

Once the rectus abdominis is separated, the traditional abdominal curling exercise will only make the abdominal muscles more open. However, the suture of rectus abdominis through cesarean section is not a good strategy because of its great trauma and slow recovery.

PRESTIGE is the perfect solution

Once the rectus abdominis is separated, the traditional abdominal curling exercise will only make the abdominal muscles more open. However, the suture of rectus abdominis through cesarean section is not a good strategy because of its great trauma and slow recovery.

HIFEM muscle selectivity

HIFEM "Muscle hypercontraction" Exercise VS Ordinary muscle exercise.

- Muscle motor neurons are controlled by the brain, and the intensity and amplitude of muscle contraction are limited, only some muscles can exercise.
- It is difficult to achieve muscle gain in a short period of time.

- Using HIFEM technology penetrate into 8cm muscle tissue, and using high-frequency contraction signal directly launch motor neurons;
- Up to 30,000 extreme muscle exercises in 30 minutes, surpassing ordinary exercises, causing many muscles to produce high-frequency .

Q: How is the feeling to do HIFEM beauty muscle machine? Will it hurt?

Q: How should we choose?

A: The process is painless and noninvasive. There is no need for anesthesia. The feeling during the treatment is the same as that of your muscles during intense exercise.

A: Many studies have confirmed that the metabolic activity of buttock fat is lower than that of abdominal fat. Because of this, it will not dissolve fat when treating buttocks.

Technical Specifications

Independent four-controlling systems +RF

Handle number	4 handles
Display screen	15.6 inch colour touch screen
Magnetic wave frequency	1-100Hz
Output power	300W-400W
Input voltage	AC220V/AC110
Fuse	20A
Radio frequency	5MHz
Host size	48*54*128cm
Size of flight shipping case	82*73*140cm
Gross weight	About 95Kg

Weight Loss & Body Building Machine

• Easy to get in shape without exercise
